

Food Grade Conveyor Belts

Locker Group conveyor belts are manufactured in SST304 Stainless Steel Wire, suitable for the food manufacturing industry.

Locker Group Unigrad and Spiragrad conveyor belts are custom manufactured to suit the exact application and particular requirements determined by our customers.

All belts destined for the food manufacturing industry are manufactured in Grade SST304 stainless steel wire, which meets the standards for food manufacturing in Australia and is suitable for all food processing equipment.

Test certificates showing the wire's conformance to Grade SST304 specifications are available on request.
